DRIVING THE GOOD MOVE

etomotors.com

ETO Motors is here to drive a revolution. One that begins with electric vehicles, and stretches to cover the entire spectrum of electric mobility. From passenger and cargo vehicles, to charging infrastructure. Manufacturing and fleet operation, to analytics and technology. ETO Motors is a 360-degree solution provider built on breakthrough engineering.

**TECHNOLOGY | INNOVATION | INVENTION | MANUFACTURING |
FLEET MANAGEMENT | SYSTEMS AND SOFTWARE | CHARGING
INFRASTRUCTURE | ENERGY AS A SERVICE**

ETO is on the brink of taking the EV revolution across India, helping the country truly make a good move. And we do this with an unwavering eye on the welfare and upliftment of our central stakeholder – the driver. Particularly women drivers. So that they're in the driving seat of change. For themselves, and the world.

An ecosystem of goodness. Transforming the way we move.

At ETO, we have reimagined first and last mile logistics. For passenger movement, and for businesses and their deliveries. We bring a whole fleet of services, fully integrated, and automated. And ready to take you places.

Manufacturing a better tomorrow.

At ETO Motors, the central focus is on making a future that's greener and greater. For us, and the planet. And here, it all begins at home. We manufacture our own e-vehicles. Trilux, the passenger e-auto. And Bulke Plus, our lightweight, heavy-duty cargo vehicle.

Trilux

Get to every corner of every city, without leaving a carbon footprint. ETO Trilux is our EV for first and last mile passenger transport. Built for easier and safer driver and passenger mobility. It's silent, it's app-based, and runs for 148 km on a single charge. It's ICAT* certified, it's powerful. It's all that you'd want in an EV.

Bulke Plus

Get ready to take your business places. With an EV that's light-weight, has greater capacity, and a far greater range per charge. It's designed for heavy-duty performance for day-to-day business logistics. It can carry up to 550 kgs, and does a 145 km run in one charge, leaving behind zero emissions. It's IoT-enabled so you can track its every move, for more efficient deliveries, and business.

Where all the goodness is manufactured.

Transformation comes in the form of high-quality, high-performance EVs. Made from scratch, at our state-of-the-art manufacturing unit in Jadcherla, Telangana. It has the capacity to build 40,000 units per year. Every vehicle undergoes in-line in-depth checking by specially-trained experts and our quality team. Incoming materials, outgoing components, they're all assessed at two checkpoints. Then, our after sales service team conducts third party pre-despatch inspection. So your EVs are in line with your every functional requirement.

A fleet of opportunities, at your service.

On-demand, integrated, fully automated. Our electric cargo and passenger fleet services are here to transform business and daily commute, in the most efficient and economical way.

From first and last mile deliveries, fleet expansion, to mobility services for everyday commuters, our fleet service comes tailored to help you meet your targets. It's IoT-enabled, so you can track, manage, monitor, and secure every move, through easy-to-use software.

Powering a revolution of change. ThunderBox, and our charging services.

ThunderBox. The 220-240 V, IoT-enabled AC charger for EVs. Easy to install, app-based control, ready to electrify the future. ThunderBox supports tracking charging progress remotely. It can also be geotagged on Google Maps, so finding the nearest one can't get easier. ThunderBox has a vast network, and is fast-growing for public access. Ready to make its way to every corner of the country.

A smart move. A move towards the future. The ETO technology.

With the EV being revolutionary, it's management and control must be too. Especially for efficient and great business impact. That's why every ETO comes with a breakthrough digital platform to give you the complete picture at all times. And keep control, management, and analytics, always at your fingertips.

MANAGE

Monitor deliveries, location, and status, right from this platform. Making fleet services management, effortless. And efficient.

MONITOR

Live tracking, charging status, battery usage. Check every aspect of your vehicle's performance. Our digital platform keeps you in control of your fleet, maximising vehicle and driver potential.

SCHEDULE

Schedule charging. Set reminders and get notifications. Optimise infrastructure usage.

LOCATE

Thunderbox is geotagged, making it easy for you to locate the nearest charging station. You can even set up automatic alerts for when there's one nearby.

TRANSACT

End-to-end, all transactions are digitised. Making every move smoother and simpler.

Why the good move is great for you.

The ETO ecosystem is designed thoughtfully, to give you and your business, seamless movement, and growth. Here's all you need to know about what makes ETO the good move.

Safety first. An industry first.

- Real-time GPS tracking
- 24/7 cloud video recording
- Remote immobilisation
- Reverse camera & internal camera
- Seatbelts for driver & passengers
- Stable & topple-free design

Green and digital.

- Zero tailpipe emissions
- Reduced carbon footprint
- End-to-end digitalised transactions

Seamless deliveries.

- One-stop clean mobility for intra-city delivery
- Lower spending, higher savings
- Live tracking & end-to-end visibility

Managed services.

- In-house delivery handling
- Tailored client-specific solutions
- Reliable, on-time delivery

Taking the good move, across the country.

The ETO revolution has embarked upon its journey, and made its way to many big cities across the country. For passenger movement, as well as cargo. Presently, ETO Motors is operational across Kevadia, Hyderabad, Delhi, Bengaluru, Noida, Nagpur, Chennai, Vijayawada, and Visakhapatnam. And now, our route is mapped to every corner of India. We're ready to take over.

Riding the revolution with us. Our partners.

Along the journey of driving the good move, our vision has resonated with many great players around the country. ETO Motors is proud to have partnered with some of the biggest names in e-commerce, like Amazon, Flipkart, Big Basket, DHL, Gati, Bisleri, Delhivery, amongst many more, for last-mile cargo delivery. And for passenger last-mile connectivity, we have corporations like DMRC, Hyderabad Metro, Chennai Metro, Nagpur Metro and UBER on board.

For the people, for the planet. For the greater good. All that we do at ETO.

What drives us is the desire to do better, for the people, and the planet. The desire to make change that will significantly make a difference for our future. And we do that through sophisticated technologies and products developed in-house. Helping make the world greener. Its people, happier. And mobility, cleaner. We do that through every move at ETO. Each one, driven by 3 Es.

Environment

Our ethos aligns with acting responsibly, preserving nature, reducing environmental impact through eco-designs, and minimising our carbon footprint.

Employment

We endeavour to strengthen our society by providing equal employment opportunities for stability, financial independence, and career growth.

Empowerment

Our purpose is to work towards the betterment of people actively, particularly by empowering women, helping them find dignity, be financially independent, and take charge of their futures.

The story of hope, and empowerment. Powered by ETO.

The story of ETO begins with one of upliftment. To empower every woman to drive her own destiny. Steering towards a life that's bigger, more stable, and more independent. Societal well-being of the less privileged is deeply embedded in our ethos. And we create paths towards better futures, so they can find their own.

The journey began in Kevadia.

ETO created an EV-only zone in Kevadia, and we were the first organisation to deploy an all-woman-driver fleet there.

Project Darussalam.

ETO took a trip to the heart of Old City Hyderabad, to take women on a journey of stability and independence. We worked with NGOs, social workers, leaders, media and philanthropists. And we helped them find a path towards great opportunities.

OYES – Own Your ETO Scheme.

From empowerment, to entrepreneurship. ETO's OYES is all about giving our drivers ownership of the EV they drive. At a nominal cost, after 36 months of employment with ETO on a payroll basis. Starting a new journey takes opportunity, acquiring loans without credit profiles, and understanding the basics of entrepreneurship. We at ETO understand that. And we endeavour to make that journey a lot smoother, and successful.
